

Dear Sir's, Please reject NAB 04-160. Satellite radio is a big improvement over the monopolistic commerical radio stations in this country who's program mangers and owners decide what is offered on thier stations. They base their decisions on what makes them money and not what is usefull. Satellite radio is radio by choice, those who choose to subscribe and pay the fees enjoy programming that suites thier taste. We have far to much government interference as it is and I'd suggest that the money being spent to challange satellite radio by the NAB should be donated to the families of the brave soldiers that are defending our country.
